3. Soln

(a) Full Sq + $\frac{\text{half sq}}{2} =$

$$45 + \frac{28}{2} = 45 + 14 = 59$$

Let it be 2cm by 2cm given on a paper. Convert it into km²

$$\begin{aligned} 10\text{cm} &= 0.5\text{km} \\ 2\text{cm} &= x \end{aligned}$$

$$\frac{10\text{cm} \times x}{10\text{cm}} = \frac{2\text{cm} \times 0.5\text{km}}{10\text{cm}}$$

$$x = 1\text{km}$$

To get the area = $1\text{km} \times 1\text{km} = 1\text{km}^2$

$$\therefore 59 \times 1\text{km}^2 = 59\text{km}^2$$

Actual area of Lake Victoria = 59km² (Answer)

(b) Let Map Scale $1\text{cm} = 50000\text{cm}$
 $1\text{cm} = 0.5\text{km}$

Area given: 163.4cm. Convert into km

$$10\text{cm} = 0.5\text{km}$$

$$163.4\text{cm} = x$$

$$10\text{cm} \times x = 163.4\text{cm} \times 0.5\text{km}$$

$$\frac{1 \text{ cm}}{1 \text{ km}} \times x = \frac{163.4 \text{ cm}}{1 \text{ cm}} \times 0.5 \text{ km}$$

$$x = 163.4 \times 0.5 \text{ km}$$

$$x = 81.7 \text{ km}$$

(3 marks)

∴ Distance from Bukeba town to Mutukula is 81.7 km.

c) - Contours

- Topographical Stations

- Spot heights

- Bench Marks (BM)

(2 marks) @ 0.5 mark

4 @ Equatorial Climate (2 marks)

b) - Agriculture eg Coffee

- Lumbering eg. Presence of Forests (3 marks)

- Fishing activities eg. water bodies

$$c) 28 - 14 = 14^{\circ}\text{C}$$

$$\text{Annual Range} = 14^{\circ}\text{C} \text{ (2 marks)}$$

$$d) \text{Total Annual rainfall} = 80 + 100 + 125 + 155 + 80 + 25 + 12 + 28 + 45 + 65 + 110 + 105 = 2055 \text{ mm. (2 marks)}$$

5/ (a) Chain Survey is the type of Land Survey which is conducted by using chain. (1 mark)

(b) (i) Gross errors (1 mark)

(ii) Check the chain before chaining

- Avoid steep slopes and major obstacles
- Keeping chain line short

Q - It help to prepare topographical Maps

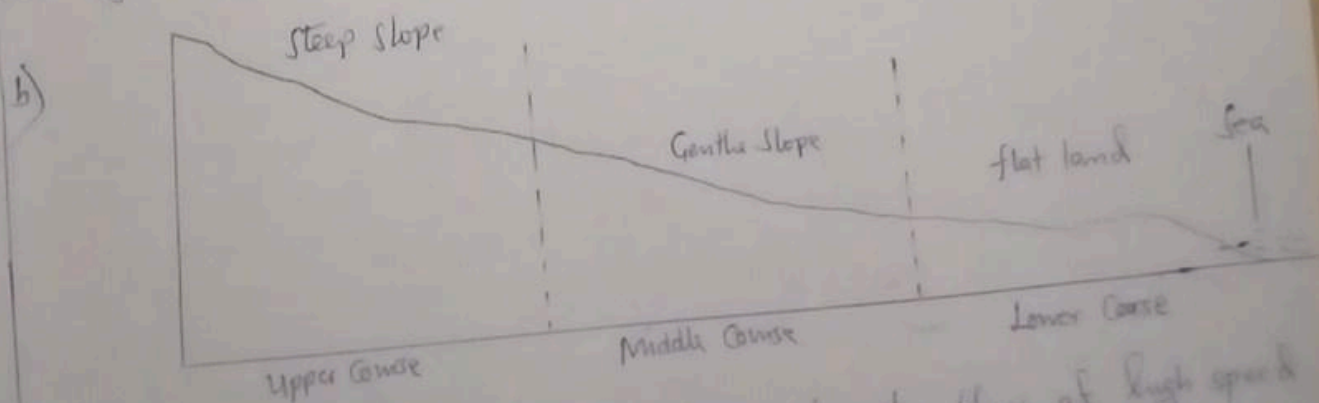

- It is used in engineering to show features like Irrigation Canals
- It help to prepare Contour Maps
- Used for Geological Survey (Marks 4)

6 (a) Is the Scientific Investigation that involves Collecting, Analysing and Interpretation of data to generate knowledge on Geographical phenomena (1mark)

(b) - For Searching new knowledge

- For Understanding principles and laws of nature in the universe
- For solving problems in the society
- For developing various programmes and policies
- For testing validity of theories
- For Informing the citizen about the social-economic activities
- For creating economic opportunities to researchers
- It clarifies Confusions (8marks)

7. (a) Long profile is a Course from its Source to its Mouth (1)mark

- Upper stage is characterised by steep slope and water flows at high speed resulting in vertical erosion. while in lower course there is flat land/deposits and deposition taking place.

- 8 - Birth rate due to family planning
- Birth rate change from 6 to 5 due to good health services
- Fertility rate change from 4.9 to 4.7 due to provision of education.

SECTION C:

9 Introduction

- definition industrialization 1.5 marks

- Main body

- Availability of raw materials

- Science and technology

- Availability of skill labour

- Good infrastructure (2 marks @)

- Good government policies

- Political Stability

any other relevant point

Conclusion: 1.5 marks

10 - Introduction

- definition of Tourism (1.5 marks)

- Main body

- Improvement of infrastructure

- Improvement in standard of life

- Improvement in health services

- Growth of trade (2 marks @)

- Employment opportunities

- Improvement in science and technology

any other relevant point

Conclusion (1.5 mark)

11: Introduction

defn ~~climate~~ (1.5 mark)

Main body

- Climate

- Fertility

- Topography

- Security

- Drainage System
- Availability of Social Services (2 marks @)
- any other relevant point
- Conclusion - (1 mark)
