

**THE UNITED REPUBLIC OF TANZANIA
THE PRIME MINISTERS OFFICE REGIONAL ADMINISTRATION AND LOCAL
GOVERNMENT**

**GEOGRAPHY F IV -MAKANG'WA
MARCH 2026**

TIME: 2:00 HOURS

INSTRUCTIONS

1. This paper consists of sections A, B, and C with a total of eight (8) questions.
2. Answer all questions in sections A and B and two (2) questions from section C.
3. Section A carries sixteen (16) marks, section B carries fifty-four (54) marks, and section C carries thirty (30) marks.
4. Unauthorized materials are not allowed in the examination room.
5. Write your name on every page of your answer booklet(s).

SECTION A (16 Marks)

Answer all questions in this section.

1. For each of the items (i) - (x), choose the correct answer from among the given alternatives and write its letter beside the item number in the answer sheet provided.
 - (i) The outer layer of the internal structure of the earth, on which we build infrastructures like roads and houses, is called:

A. The mantle	B. The crust
C. The hydrosphere	D. The atmosphere
E. The core	
 - (ii) When the orbit of a heavenly body is nearest to the sun, it is known as:

A. Perihelion	B. Equinox	C. Aphelion	D. Sunrise	E. Sun set
---------------	------------	-------------	------------	------------
 - (iii) Traders transport cement from Tanga to Dar es Salaam for sale. This activity belongs to which type of geography?

A. Physical geography	B. Human and economic geography
C. Practical geography	D. Political geography
E. Environmental geography	
 - (iv) The local time at Washington D.C., located at 75°W, is 05:00 pm Friday. What is the time and day at Zanzibar, located at 39°E?

A. 02:00 am Saturday	B. 08:00 am Saturday	C. 02:00 am Friday
D. 01:00 am Saturday	E. 03:00 am Saturday	
 - (v) One of the following is NOT a cause of earthquakes:

A. Tensional forces	B. Lateral movement	C. Soil erosion
D. Vertical movement	E. Faulting	

- (vi) The process where the outer layers of a rock crack and peel off due to differences in expansion and contraction is called:
- A. Granular disintegration B. Salt crystallization C. Exfoliation
D. Block disintegration E. Oxidation
- (vii) A group of students observed the uniform removal of a thin layer of soil by running water on a rainy day. This type of soil erosion is known as:
- A. Wind erosion B. Rill erosion C. Gully erosion
D. Sheet erosion E. Splash erosion
- (viii) Igneous rocks formed when magma cools and solidifies deep within the Earth's crust are specifically called:
- A. Extrusive igneous rocks B. Hypabyssal igneous rocks
C. Sedimentary rocks D. Plutonic igneous rocks
E. Mafic rocks
- (ix) The solar system is made up of the sun, planets, and other heavenly bodies. Which of the following planets has the shortest orbit around the sun?
- A. Pluto B. Venus C. Earth D. Mars E. Mercury
- (x) The feature commonly found at the base of a waterfall in the upper course of a river is a:
- A. Meander B. Plunge pool C. Knick point D. Sink hole E. Delta

2. Match the description of weathering processes in **List A** with their correct concepts in **List B** by writing the letter of the corresponding response beside the item number in the answer booklet provided.

List A	List B
(i) Rock disintegration caused by the actions of plants and animals.	A. Granular disintegration B. Mechanical weathering C. Biological weathering D. Exfoliation E. Erosion F. Mass wasting G. Hydrolysis H. Denudation
(ii) Rock disintegration which does not involve chemical processes.	
(iii) The process of removing rock debris from one area to another by agents like wind, water, or waves.	
(iv) The movement of weathered material downslope due to gravity.	
(v) Releasing rock grains or particles as they have different capacities of withstanding heat.	
(vi) Occurs when large curved sheets of rock peel away from the main rock body—much like the layers of an onion.	

SECTION B (54 Marks)

Answer all questions in this section.

3. Carefully read and answer the following questions
- a) A cartographer wanted to have an actual size of Lake Victoria. Hence, he used the transparent grid squares paper with 2cm wide overlaid it on the sheet of Kagera Region then marked the complete squares with green marker and incomplete squares with yellow marker. After he counted them, he found the Complete squares were 45 and incomplete squares were 28. Finish his work by provide the actual area of Lake Victoria in Km² occupies the Kagera region. (4 marks)
 - b) Bus driver wanted to know how far he is going to cover from Bukoba town to Mutukula. He remembered his geography knowledge on finding the distance of an area on a map then, he took the Kagera sheet and measure the distance he will travel. Eventually he smiled after knowing he will cover a distance of about 163.4 cm. What is the actual distance he is going to travel from Bukoba town to Mutukula? (3 marks)
 - c) List down four methods of showing relief features of kagera town (2 marks).

4. Read the Monthly Climate Data of Serengeti (2025/2026 Avg) then answer the questions that follow.

Month	J	F	M	A	M	J	J	A	S	O	N	D
High (°C)	28	28	28	26	25	25	25	26	27	28	27	27
Low (°C)	15	15	15	16	15	13	13	14	14	15	15	15
Rain (mm)	80	100	125	155	80	25	12	28	45	65	110	105

- a) Identify the type of climate for the area represented by the data. (2 marks)
 - b) With examples, describe three possible economic activities which might take place in an area with the type of climate you mentioned in (a). (3 marks)
 - c) Calculate the annual range of temperature. (2 marks)
 - d) Calculate the total annual rainfall. (2 marks)
5. (a) What is a chain survey? (1 marks)
- (b) A Form Three survey team encountered discrepancies in their chain survey data due to the improper arrangement of the ranging poles.
- (i) What is the likely type of discrepancy the survey team encountered? (1 mark)
 - (ii) List three things the survey team should have done to avoid such discrepancies. (3 marks)
- (c) Explain four importance of surveying. (4 marks)
6. a) You are a junior consultant for a firm that wants to launch a new product. Your supervisor asks you to explain the concept of "research" to a new client who has no background in the field. In your own words, write a brief explanation to the client defining "research." (1 mark)
- b) The client from part (a) is now convinced of the definition but is hesitant to allocate budget for it, asking, "Why can't we just rely on our years of experience in the market?"

Persuade the client, by providing a convincing outline detailing eight distinct points on the importance of research. (8 marks)

7. a) What is a long profile of a river? (1 mark)
b) Draw a well-labeled long profile of a river and describe the characteristic features of its upper and lower stages. (8 marks)
8. Observe carefully these facts Between 2020 and 2025, which shows Tanzania experienced significant demographic shifts:

Indicator	2020	2025 (est.)
Total Population	59.7 million	71.4 million
Birth Rate	35/1,000	34.55/1,000
Death Rate	6.0/1,000	5.75/1,000
Total Fertility Rate	4.9 children/woman	4.7 children/woman

"Population is not static." Using the Tanzania scenario above, explain THREE distinct factors that have influenced Tanzania's population change between 2020 and 2025. (9 marks)

SECTION C (30 Marks)

Answer only two (2) questions from this section.

9. Industrialization remains a defining characteristic of present-day economic development. Critically analyze six key determinants that shape the course and success of industrial development in a nation. (15 marks)
10. The recent "Royal Tour" documentary has significantly elevated the international profile of Tanzania's tourism sector. With reference to specific, concrete examples from the East African region, critically evaluate six significant socio-economic with the growth of the tourism industry. (15 marks)
11. Juma is a form four student at mwembechai secondary school, he was debating with his fellow students on how settlement grows, as a form four student help juma to understand what are the factors that bring settlement growth in different parts of the world.
