Time: 3:00 HOURS

Wednesday 18th March 2026 P.m.

INSTRUCTIONS

wazaelimu.com

1. This paper consists of sections A, B and C with a total of **eleven (11)** questions
2. Answer **ALL** questions from section A and B, and **two (02)** questions from section C
3. Section A carries **sixteen (16)** marks, section B **fifty-four (54)** marks and section C carries **thirty (30)** marks.
4. All writing must be in blue or black ink except drawing which must be pencil
5. Map extract of Ilonga (sheet 256/2) is provided.
6. Programmable calculators, communication devices and any unauthorized materials are not allowed in the examination room.

SECTION A (16 Marks)

Answer **all** questions in this section

1. For each of the items (i) – (x) choose the correct answer from among the given alternative s and write its letter besides the item number in the answer sheet provided.
 - i. Form three students were revising the concept of features formed by wind erosion. What do you think is correct about the features formed by wind erosion?
 - A. Batholith, dykes, and volcano
 - B. Rock pedestals, yardangs and zeugens
 - C. Sills, batholith and phacolith
 - D. Crystalline, sediments and metamorphic
 - E. Soil profile, soil texture and rocks
 - ii. Rise and fall of population of any country is determined by number of factors. Suppose you have been invited by the district commissioner of Mbanga district to participate and contribute about the demographic change of the district. Which major three factors could you suggest?
 - A. Mortality, fertility and climate
 - B. Fertility, edaphic and mortality
 - C. Fertility, migration and diseases
 - D. Accidents, fertility and climate

- E. Mortality, birth rate and migration
- iii. Dormant volcanic mountains are those which:
- A. Have ever experienced eruption
 - B. Have erupted once but are no longer active
 - C. Continue to erupt occasionally
 - D. Erupt only when there is an earthquake
 - E. Erupt everyday
- iv. A geography teacher was teaching her students that, the earth is inclined in its orbit at which the intensity of sun rays reach different part of the earths varies and cause the earth to experience seasonal weather changes. By relating with the revolution of the earth, what result might occur on the earth?
- A. Day and night
 - B. Deflection of wind and ocean current
 - C. Seasons of the year
 - D. High tides and low tides
 - E. Lunar eclipse
- v. Farmers at Kiwombi village invited farm officer to give them knowledge on the kind of good soil for growing maize plant. One of the knowledge he provide was about rocks permeability. Assume you are the one invited, what would you tell the farmers about permeability of rock?
- A. The ability of the rock to hold water
 - B. The ability of the rock to allow water to pass through
 - C. The rate at which water enter the rock
 - D. The ability of the rock to allow water to enter it
- vi. The tourists enjoyed the temperature of Zanzibar when was 32⁰c at sea level. They also planned to travel from Zanzibar to Manyara which is 1500m above sea level. What will be the temperature experienced by the tourists in Manyara?
- A. 23⁰C
 - B. 9⁰C
 - C. 19⁰C
 - D. 17⁰C
 - E. 16⁰C
- vii. Suppose you were given several types of minerals and you were asked to select three non-metallic minerals. What would be your selection from the following alternatives?
- A. Oil, diamond and coal
 - B. Coal, gold and copper
 - C. Natural gas, silver and diamond
 - D. Copper, silver and oil
 - E. Gold, natural gas and diamond

- viii. The form four students were observing a photograph of an extensive land in Australia where Merino sheep are cared for production of wool. How is this type of livestock keeping called?
- Transhumance
 - Nomadism
 - Pastoralism
 - Ranch
 - Sedentary
- ix. Mountainous regions can affect climatic nature by forming the rain type known as
- Cyclonic rainfall
 - Orographic rainfall
 - Convectional rainfall
 - Thunderstorms
 - Dew rainfall
- x. Kalist is a farmer in Ruvuma region. He travelled to Mikumi national park for leisure. Who is Kalist in Mikumi national park?
- Farmer
 - Surveyor
 - Tourist
 - Researcher
 - Geographer

2. Match the items in **LIST A** with its response in **LIST B** by writing a letter of the corresponding response beside the item number in the answer sheet provide.

List A	List B
i. A layer of igneous intrusion which is vertical that cut across bedding planes of the crustal rock	A. Phaccolith
ii. A dome-shaped igneous intrusion with a flat floor	B. Batholith
iii. Is the largest intrusion of all igneous intrusion.	C. Caldera
iv. A column made up of very viscous lava and which stands above the general ground like pillar	D. Laccolith
v. Is a funnel-shaped volcanic depression which forms at the upper end of a volcanic	E. Plateau
vi. Large, extensive and uplifted part of the earth's crust almost flat at the top	F. Crater
	G. Lapolith
	H. Plug domes
	I. Lava plateau
	J. Dyke
	K. Sill

SECTION B (54 Marks)

Answer all questions in this section

3. Carefully study the map extract of ILONGA (Sheet 256/2), then answer the following questions:
- Measure the distance covered by the river in kilometers from grid reference 630000 to 600979
 - Use the square method to calculate the area covered by Namihondo pond
 - With evidences, mention three (03) economic activities which may be conducted on a mapped area
 - Describe the nature of relief of the area
 - With one reason, suggest the type of climate
 - Identify any three (03) factors which have influenced the population distribution of Ilonga town
4. Dr. Mwasa is a chemist and he is interested to conduct a research about beverage to see the best drinks for human consumption. His plan is to consult consumers who were directly involved in the consumption and visit other scholar's written documents for more information.
- Name the main sources of data for his study
 - Suggest the question of his research
 - Mention other six possible sources of research problem for the similar study
5. Amani as the most famous livestock keeper in Kikwajuni Ward was about measuring distances, angles, directions and elevations in order to position his livestock's sheds and a storage building. His best friend Mr Chapakazi who is a professor at the university of Dar es salaam insisted him that preliminary inspection of the area before the actual work begins is very important for the better outcomes.
- What is the name of the process that Mr. Chapakazi insisted Amani to do first
 - Why is that stage taken as the important one to every surveyor? Seven (07) points.
6. Carefully study the data given on the table below and then answer the questions that follow:

Class	Frequency
20-24	3
25-29	7
30-34	8
35-39	12
40-44	9
45-49	6
50-54	4
55-59	1
60-64	0

- Find the
 - Mean
 - Mode
- Briefly explain four types of line graph

7. The photograph taken by the means of helicopter need people with enough knowledge, skills and money for making it successfully.
 - a. Name the type of photograph described above
 - b. Provide four features of a photograph mentioned above
 - c. Provide three (03) differences between the photograph mentioned in (a) above and that taken at angle less than 90°
8. Three students from St. Dorothea Secondary school visited Ngorongoro national park as the study tour, in their way back to school they observed seasonal fluctuation of water in the river.
 - a. Name the feature observed by the students
 - b. Briefly explain the types of the feature in (a) above
 - c. Explain three (03) positive impacts and three (03) negative impacts of the feature named in (a) above.

SECTION C (30 Marks)

Answer two (02) questions in this section

9. Population has a tendency of increasing inversely proportion to the resources. Some demographers argue that population growth has many positive effects than negative. Using six (06) points explain the negative impacts of rapid population growth to the country like Tanzania.
10. Sir.Mgeni as a geography teacher taught his students that small scale agriculture has been greatly affected by the rapid population explosion. As a form four student explain how does rapid population explosion affects small scale agriculture.
11. Environmental degradation is a serious problem caused by human activities. Examine six (06) measures to be taken to prevent the situation.
