Time: 3:00 HOURS

Wednesday 18th March 2026 A.m.

INSTRUCTIONS

1. This paper consists of section **A, B** and **C**.
2. Answer all questions in section **A** and **B** and **two (2)** questions from section **C**.
3. Section **A** carries **16 marks**, section **B**, **54 marks** and section **C** carries **30 marks**.
4. Except for drawings which must be drawn in pencil, all writings must be in blue or black ink.
5. Cellular phones and any unauthorized materials are not allowed in the examination room,
6. Write your examination number on every page of your answer booklet (s)

SECTION A:(16 Marks)

Answer all questions in this section

1. For each of the following items (I)-(x) choose the correct answer from among the given alternatives and write its letter besides the item number in the answer booklet (s) provided
 - i. As a first aider which of the following you can advise matron not to do to a person who is bite. by a snake during giving first aid-----
 - A. To take a victim from dangerous area
 - B. Giving an alcohol to a victim
 - C. Giving a hopefully words to a victim
 - D. Laying a victim at a comfortable area
 - ii. A food sample x turned blue black when treated with iodine solution. The detected food substance in sample x performs which function in the human body?

 - A. Initiate digestion of food
 - B. Supplies the body with sufficient water
 - C. Builds up the body
 - D. Provides the body with energy
 - iii. The joints which allow movement in many direction are-----

- A. Glind and hinge joint
 - B. Glind and pivot joints
 - C. Ball and glind joints
 - D. Ball and socket joint
- iv. The role of optimum temperature in cellular activities is to.....
- A. Change the chemical reaction
 - B. Balance equilibrium of the reaction
 - C. Creates favourable environment for enzymes
 - D. Speed up the rate of chemical reaction
- v. The following balanced habit contains grasses wildbest ,lion and bacteria what would happen if the the lions were removed-----
- A. The amount of grass would increase
 - B. The amount of grasses of grasses would decrease
 - C. The number of wildebeest would decrease
 - D. The number of bacteria would remain the same
- vi. which of the following is not a characteristics of class aves.....
- A. Fertilization is external
 - B. Body is covered by feather
 - C. Legs have scutes
 - D. Body is stream lined
- vii. Structure that have the same origin but different functions are called-----
- A. Analogous structures
 - B. Homologous structures
 - C. Vestigial organs
 - D. Adaptive structures
- viii. The process of caring people living with HIV/AIDS is important because-----
- A. It can cure AIDS
 - B. It gives the patient hope
 - C. The patient gets many visitors
 - D. It makes patient like a boss

- A. Movement and nutrition
 - B. Nutrition and Reproduction
 - C. Reproduction and growth
 - D. Irritability and movement

- x. A patient has been diagnosed with high level of blood sugar what would you recommend to a victim sugar -----?
- Glucagon
 - Insulin
 - Aldesterone
 - Testosterone

2. Match the phrases in list A with the response in list B by writing the letter of the correct response from listB beside the item number in the answer booklet provided.

LIST A	LIST B
i. Ecological niche	A. Non-living component of an ecosystem
ii. Predator	B. Physical factors that influence environment such as temperature
iii. Competition	C. Interaction where one organism benefit while the other is harmed
iv. Biotic factor	D. Interaction where both organism benefie
v. Abiotic factor	E. Organism that competefor some resources in an ecosystem
vi. Parasitism	F. Organism that hunt, kill other organism for food
	G. Species role in an ecosysm
	H. Living components
	I. Feeding relationship where by organism struggle for limited resources

SECTION B:(54marks)

Answer all questions in this section

3. (a)What do you understand by the following terms.
- Seed dormancy.
 - Hypogeal germination.
- (b) Explain how the following factors can lead to seed germination.
- Water. (ii) Temperature. (iii) Oxygen.
4. (a)Mr shamba got a car accident and was badly injured .During the first aid process Mr Maduhi put on gloves,took a cotton wool and gave him a pain killer what was the use of
- Gloves
 - otton wool
 - Pain killer
- (b)Draw the diagram of monkey cell and label the parts which perform the following functions
- Site of chemical reaction

- ii. Site of respiration to take place
 - iii. Determine the hereditary characteristics of a cell
 - iv. It encloses the whole cell
5. (a) Suppose you are teaching biology at a certain school in Mbinga district. During a biology class session one student asked you a question which states that why plants do not need an elaborated excretory system similar to that of animals such as human being respond by explaining briefly four points
- (b) What do you understand by the term excretion?
6. During surgery Dr Mwanzomoja accidentally cut two blood vessels, one blood vessel flow blood at high pressure and other blood vessel flow blood at low pressure
- (a) Name these vessels which flow blood at
- i. Low pressure
 - ii. High pressure
- (b) Differentiate those blood vessels in terms of
- i. Valves
 - ii. Lumen
 - iii. Direction of blood flow
7. (a) Why Mendel's used garden pea plants in his experiment? (Give four points)
- (b) In guinea pig, black fur is dominant over white fur. Use genetic cross to determine the genotypic and phenotypic ratio of F₂ generation
8. Briefly describe myopia and hypermetropia show how they can be corrected use relevant diagrams.

SECTION C: (30 MARKS)

Answer two questions in this section

9. Insects are very useful organism in environment. With examples discuss by using six points.
